Pedagogical Benefits

- Develops Social Micro Learning skills and supports Lifelong Learning
- Reviews the users' learning progress from long period of time by providing learning record storage that stores all the learning activities happening inside and outside the system
- Supports many ways for self-reflection and self-assessment and contextualization of learning in real world topics, enabling users to understand how learning is a constant process throughout life and how curiosity for learning can arise from daily topics
- Educator, trainer, coach is able to define which learning methods, materials, tests and assignments are compulsory and which can be selected by the user
- Several different learning methods e.g. problem-based, experiential, theme based, phenomena, collaborative, networked learning, supported in the platform
- Nourishes the intrinsic motivation and inner curiosity of learners, instead of focusing on external motivation, expectations and measurements of success. This means taking a step away from teacher-transmitter model of learning, and equipping the learner with problem-solving and inquiry skills in meaningful and relevant real-world contexts
